

# Land of Barons

## 1. The Essentials

**Land of Barons** is a deterministic territorial control and tempo management game. Designed as an uncompromising **strategic duel** for **2 players**, it unfolds into an **epic struggle** for influence with **3 or 4 players**. With zero randomness involved, use your **deck of cards** as a true War Council to deploy your **Troops**, build your **Fiefs** through Administration, and detain defeated opponents in your Holding Quarters. The game ends with an immediate victory if a player establishes their **Supremacy** (18 points in a duel), or with a final scoring if the **Exhaustion** of forces or **Bankruptcy** hasten the end of hostilities, imposing a penalty on the Lord who failed to preserve their logistical resources.

## 2. General Information

## 3. Lore: Governing and Building

In *Land of Barons*, the conquest of Fiefs is achieved through rigorous and bold planning. Your strategy is forged in the utmost secrecy: using a deck of cards to dictate your orders, you assemble a true War Council, the nerve center of your chain of command. This council dictates every maneuver of your Baron and his powerful Knights—the only ones capable of hindering

enemy actions. Together, they lead your Troops — composed of young nobles in training and highly skilled craftsmen — across a battlefield that is unique to every game. They stand ready to fight or build, to erect your Keeps and annex rival territories in purely deterministic clashes where only your tactical superiority prevails.

The secrecy of opposing intentions and the mastery of tempo, constrained by your limited command resources, instill a genuine psychological tension around the table. Why does this opponent continue to raise Troops instead of building? Are they waiting for the perfect moment? Are they preparing to annex the Fief you have just established? It is up to you to see through their feints and choose the right time and place to strike, defend, or build.

The nobility of these clashes alters the very nature of war and spares lives. Your assaults neutralize opponents through diplomacy: defeated Troops are disarmed and placed in your Holding Quarters. Detaining these dignitaries proves your political ascendancy and grants you valuable Negotiation Points. But the construction of your own domain also demands a sacrifice: to secure your Fiefs, you must permanently assign your best men to Administration to govern them, thus depriving yourself of your vital forces.

Resolving these dilemmas is part of a relentless race for Supremacy, before the natural Exhaustion of your armies—reduced to a handful of loyalists—honorably freezes the borders without any penalty. Beware, however, of how you manage your resources. A Baron who overworks his chain of command through forced marches exposes himself to Bankruptcy. Failing to assemble your War Council forces a sudden end to the game, sanctioned by a scaling penalty calculated on the magnitude of this logistical failure.

Orchestrating this fragile balance between military deployment, diplomatic dealings, territorial administration, and deck management will be your greatest challenge. Will you be able to impose your authority to become the first of the Barons and secure your reign?

## 4. Components

- **37 Hexagonal Tiles:** Double-sided. Front: Lands worth 1, 2, 3, or 4 points. Back: Impassable Mountains (solid brown face). Each tile is identifiable on the front by a color, a crest, and a letter, distributed as follows:
  - 10 Red 4-point Tiles (Lion crest)
  - 9 Blue 3-point Tiles (Eagle crest)
  - 9 Green 2-point Tiles (Wolf crest)
  - 9 Gray 1-point Tiles (Horse crest)
- **37 Position Cards:** Matching the colors, letters, and crests of the Tiles.
- **4 Prestige Cubes:** 1 white cube for the **Free City** and 3 wooden cubes for the **Trading Cities**.
- **1 Score Track**
- **Player Materials (x4 sets):**
  - 1 Large **Baron Pawn**,
  - 4 Small **Knight Pawns**,
  - **30 Troop Tokens**,
  - **10 Small Cylindrical Keeps**,
  - **1 Deck of 43 Action cards** (pink, green and gray) and **3 Effect cards** (gray with a lightning bolt in the bottom left corner),
  - **1 Holding Quarters board**.

## 5. Goal of the Game – Game End – Winner

### 5.1. Goal of the Game

Your goal is to accumulate the most points by establishing **Fiefs** and increasing your **Negotiation** capacity. Your total score is the sum of four types of points:

- **Fief Points:** The value of each Land where you own a **Keep**.
- **Prestige Points:** Bonuses awarded if your Fiefs include the Free City or Merchant Cities.
- **Diversity Points:** A bonus rewarding the variety of conquered coats of arms (= Land colors).
- **Negotiation Points:** One point per tier of captured enemy **Troops**.

| Fiefs Pts         |   | Prestige Pts |   | Diversity Pts |   | Negotiation Pts |     |
|-------------------|---|--------------|---|---------------|---|-----------------|-----|
| Gray Land (Horse) | 1 | Trading City | 2 | 2 colors      | 2 | 3 Troops        | 1   |
| Green Land (Wolf) | 2 | Free City    | 4 | 3 colors      | 3 | 6 Troops        | 2   |
| Blue Land (Eagle) | 3 |              |   | 4 colors      | 4 | 9 Troops        | 3   |
| Red Land (Lion)   | 4 |              |   |               |   | ...             | ... |

Certain **end-game conditions** will impose negative **point penalties** on certain players.

**Important Note:** The **score track** reflects the evolution of scores in real time. You update it at the end of each player's turn whenever **Troops** are captured or **Keeps** are built or destroyed. **No point is permanent:** scores depend solely on the current state of the board. If a **Keep** is removed, all associated gains are instantly lost: **Fief Points**, **Prestige Points**, and even the **Diversity** bonus, which must be recalculated based on your remaining land colors.

### 5.2. Game End

The game ends immediately if one of the following **three conditions** is met:

- **Supremacy:** At the end of their turn, the active player reaches or exceeds the critical point threshold. They win an **immediate victory**. *Their influence is such that their rivals have no choice but to bend the knee.*
- **Exhaustion:** At the end of the active player's turn, at least one player has **5 Troops or fewer** (board and Supply combined). *Too much blood has been spilled and the heralds sound the end of the fighting.* Players then proceed to final scoring and the assignment of **penalties**.
- **Bankruptcy:** At the end of their turn, the active player has **5 cards or fewer** in hand. *The clash of arms fades before negotiations, freezing the positions of the Barons.* Players then proceed to final scoring and the assignment of **penalties**.

| Critical Thresholds |           |            |            |
|---------------------|-----------|------------|------------|
| Configuration       | Supremacy | Exhaustion | Bankruptcy |
| 2-Player Game       | 18 points | 5 Troops   | 5 cards    |
| 3-Player Game       | 14 points | 5 Troops   | 5 cards    |
| 4-Player Game       | 12 points | 5 Troops   | 5 cards    |

### 5.3. Scoring and Penalties

When a player triggers the end of the game through **Supremacy**, they are **immediately** the **winner**, and this phase of scoring and assigning penalties is skipped, even if this player reached the Supremacy threshold simultaneously with the Exhaustion or Bankruptcy thresholds.

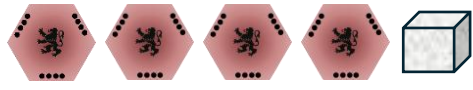

In the event of **Exhaustion** and **Bankruptcy**, without **Supremacy**, penalties are assigned by moving the markers backward on the score track, stopping at zero points:

- **No penalty** is assigned for reaching the **Exhaustion** threshold.
- **Only** the active **player** who **triggers Bankruptcy** suffers a **penalty of -1 point** for every **2 cards short** of a full hand.

After calculating the score including penalties, the player with the highest score wins. In case of a tie in points, ties are broken in the following order:

- The highest number of **Keeps/Fiefs** on the board.
- The highest number of available **Troops** (board and Supply combined).
- If the tie persists, the victory is shared!

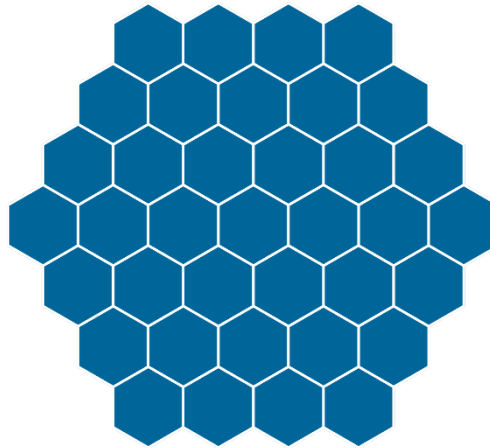

### 5.4. Scoring Examples

| Conquests                                                                           | Detained Troops | Negotiation | Lands | Prestige | Diversity | Total |
|-------------------------------------------------------------------------------------|-----------------|-------------|-------|----------|-----------|-------|
|  | 0               | 0           | 16    | 4        | 0         | 20    |
|  | 1               | 0           | 12    | 4        | 2         | 18    |
|  | 2               | 0           | 15    | 0        | 4         | 19    |
|  | 6               | 2           | 12    | 2        | 3         | 19    |

## 6. Setup

### 6.1. Shaping the Terrain

- **The Board** – Shuffle the **Tiles** and arrange them with the "crest" side visible following the hexagonal pattern below (a large hexagon with 4 tiles per side).

- **Special Positions** – Shuffle the 37 **Position cards**. For each step below, announce the element, draw a card, and place the element on the corresponding Tile:
  - **Mountains:** Draw **4 cards**. Flip the designated Tiles to their brown side (crests hidden).
  - **Free City:** Draw **1 card** and place the **white cube** on the designated Tile.
  - **Trading Cities:** Draw **3 cards** and place the **wooden cubes** on the designated Tiles.

**Important:** Return any drawn **Position cards** to the game box; they will not be used again

### 6.2. Initial Deployment

Before players choose their colors, draw the starting **Positions** for each color in play:

- **One Tile** for the **Baron**.
- **One Tile** for the **first Knight**.
- **One Tile** for the **second Knight**.

**Important:** Return any drawn **Position cards** to the game box; they will not be used again

#### Vigilance (Blocking and Balance)

- **Accessibility:** If a Baron, a Knight, the Free City, or a Trading City is isolated from the rest of the board by Mountains, redraw its Position card.
- **Connectivity:** If the terrain is too fragmented or if Tile colors are too clustered (creating unbalanced zones), players are encouraged to perform a full reshuffle of the board.

### 6.3. Preparation of the Lords

- **Turn Order** – Play proceeds clockwise. To determine the first player, each player draws one Position card. The first player is the one with the **lowest-ranked card** based on the following hierarchy:
  - **Crest Value:** Horse (1) < Wolf (2) < Eagle (3) < Lion (4).
  - **Letter:** A < B < C < D...

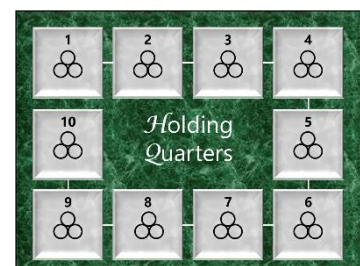

*Examples: A Wolf card (2) plays before a Lion card (4). Between two Wolf cards, Wolf "A" plays before Wolf "B".*
- **Choosing Colors** – Starting with the **last player** and moving counter-clockwise, each player chooses a color and collects their materials.
- **Supply Setup** – Each player places the following in front of them:
  - Their **Liege Knights** (2 in the Supply; the other 2 already on the board).
  - **10 Keeps** and **30 Troops**.
- **The Deck** – Shuffle your **43 Action cards** and your **3 Effect cards** to form your face-down deck
- **The Barons' Oath (Simultaneous Mulligan)** – Before the first player opens hostilities, all players proceed simultaneously:
  - **Draw** an initial hand of **6 cards**.
  - **Decision:** If your hand does not suit you, you may take a single **free Mulligan**.
  - **Procedure:** Set your 6 cards aside, draw 6 new ones, then shuffle the 6 rejected cards back into your deck. *Once all lords have sworn the oath on their hands, the conquest may begin.*

### 6.4. Finalizing the Table

- **Score Track:** Place the track in full view of all players. Each player places one **Keep** in front of the "1" space to mark their starting influence.
- **Administration:** Designate a common area (e.g., the game box lid) for all **Troops** permanently leaving the game after the construction of a **Keep**.
- **Holding Quarters:** Place a **Holding Quarters** board next to each player's **Troop Supply** to hold the **Troops** captured by that player.

The conquest begins! The first player opens hostilities, and the other players follow in clockwise order.

Below is a diagram of the table layout for 2 players.

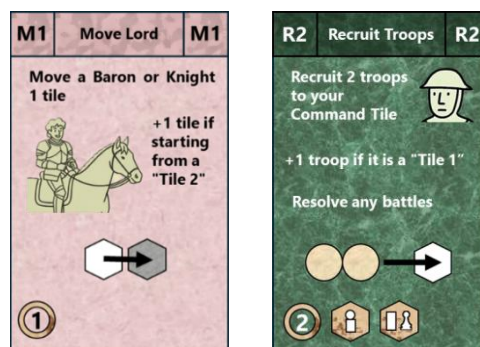

## 7. Turn Sequence

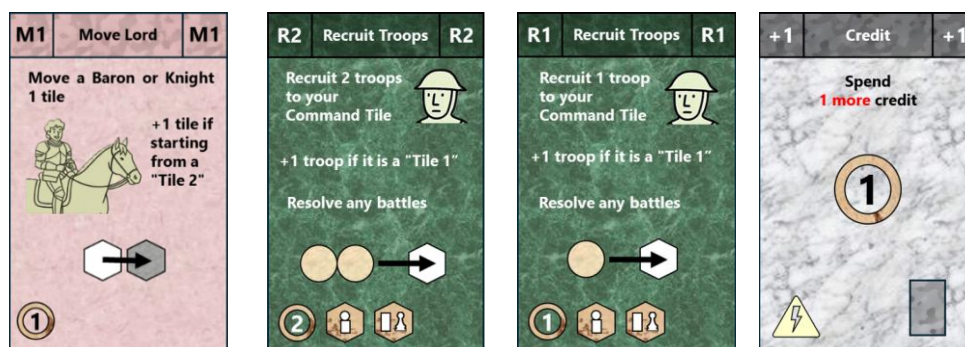

On your turn, you must choose **one** of the following two options:

### Option A — Take Action

1. **Plan** – From your hand, choose **at least 1 Action card** and, optionally, one or more **Effect cards**.
  - The **total cost of the Action cards** (indicated in the bottom left) must not exceed the amount of credits available for your turn. This amount is **3 credits by default**, but can exceptionally increase to 4 if you play the "+1 Credit" Effect card.
  - Effect cards (with a lightning bolt in the bottom left) have a cost of 0.

*Example: Playing 2 cards with costs of  $1 + 2 = 3$  credits*

*Example! Playing 3 cards with costs of  $1 + 2 + 1 = 4$  credits*

2. **Act** – Execute the instructions of the chosen cards following these rules:

- **Free Order and Association:** You choose the sequence in which you resolve your cards. Effect cards are used in different ways: some act independently (such as "+1 Credit"), others must be explicitly paired with an Action card to modify its effect. It is possible to associate multiple compatible Effect cards with a single Action card. In all cases, an Effect card is single-use and fully consumed upon resolution (see §10 for details).
- **Independence:** Each played element (an Action card with its potential Effects, or an independently acting Effect card) must be resolved fully before moving to the next. A resolution may alter the board state, thus influencing the conditions for subsequent elements played during the same turn.
- **Discard:** Once played, place your cards face-up in your **personal Discard Pile**.

3. **Reinforce** – Refill your hand to **6 cards**, or until your final deck is empty.

4. **Refresh (End of Turn)**

- Update the **Score Track** based on the final state of the board.
- Check if a threshold for **Supremacy** (points), **Exhaustion** (remaining troops), or **Bankruptcy** (cards in hand) has been reached. If so, the game ends immediately.

### Option B — Replan

If you choose **not** to play any Action cards:

1. **Purge:** Discard **between 1 and 6 cards** from your hand to your **personal Discard Pile**.
2. **Renew** – Refill your hand to **6 cards**, or until your final deck is empty.
3. **Update (End of Turn)** – As with Option A, update the score track and check the end-game conditions, specifically the **Bankruptcy** threshold (cards in hand).

## 8. Managing the Deck and Discard Pile

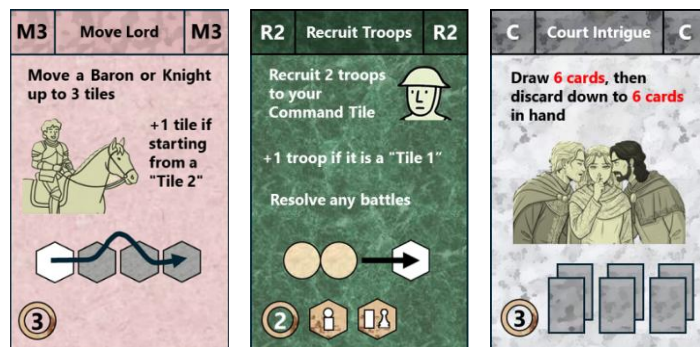

- **Transparency:** Your opponents may ask to examine the cards you have just discarded during your turn. Once the examination is complete, place the cards back so only the top card of the pile remains visible
- **Confidentiality:** Aside from this immediate consultation, the contents of the discard piles are secret. No player may browse their own discard pile or that of a rival.
- **Deck Cycling:** As soon as your deck is empty and you still need to draw cards to refill your hand:
  1. First, draw the remaining cards from your deck, if any.
  2. Shuffle the cards in **your discard pile**.
  3. This forms your **new** and **final deck**.
  4. Take the **top 6 cards** of your deck. These cards are set aside, face down, to form your **Reserve Deck**. The rest of the cards constitute your **main draw pile**:

- Draw from your main draw pile.
  - When it is empty, spread the 6 cards of your **Reserve Deck** face down in front of you, acting as a visual countdown.
  - From now on, you draw from your Reserve Deck.
5. Finish refilling your hand.

## 9. Action Card Effects

Action cards are divided into three types, identified by their background color, as shown in the figure below:

- **Pink Background:** Lord Actions (Baron or Knight).
- **Green Background:** Troop Actions.
- **Gray Background:** Action on your hand or an opponent's hand.

The following table provides a summary of the 43 Action cards.

| Action Card        | Credits | Quantity | Groups |    |    | 43 |
|--------------------|---------|----------|--------|----|----|----|
| Move Lord 3        | 3       | 4        | 15     |    |    |    |
| Move Lord 2        | 2       | 5        |        |    |    |    |
| Move Lord 1        | 1       | 6        |        |    |    |    |
| Recruit Troops 3   | 3       | 2        | 9      | 17 | 23 |    |
| Recruit Troops 2   | 2       | 3        |        |    |    |    |
| Recruit Troops 1   | 1       | 4        |        |    |    |    |
| Concentrate Troops | 1       | 3        | 8      |    |    |    |
| Disperse Troops    | 1       | 5        |        |    |    |    |
| Build Keep         | 3       | 6        | 6      | 6  |    |    |
| Long Ride          | 3       | 1        | 5      |    |    |    |
| Recruit Knight     | 3       | 1        |        |    |    |    |
| Exile Knight       | 3       | 1        |        |    |    |    |
| Court Intrigue     | 3       | 1        |        |    |    |    |
| Spy                | 2       | 1        |        |    |    |    |

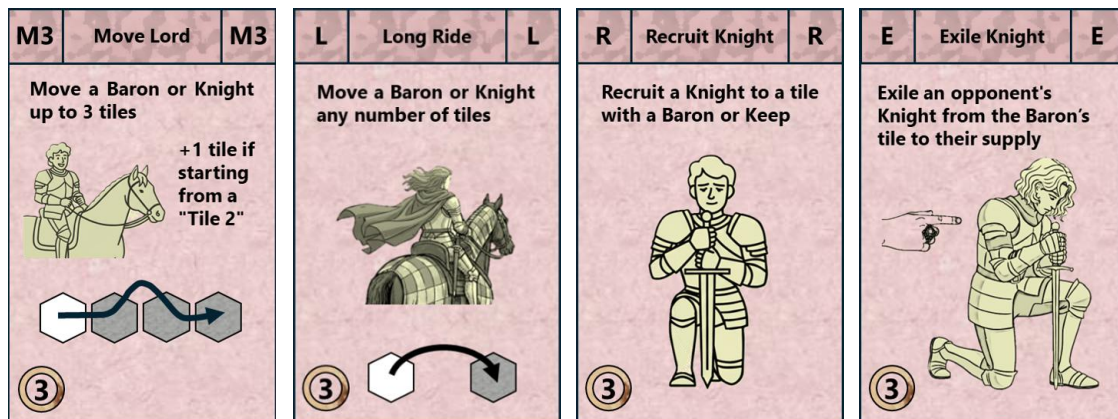

For each card, its name, type (via background color), cost, and quantity are listed.

The rare cards are grouped at the bottom of the table.

Action cards are described in detail by type in the following sections.

## 9.1. Lord Action Cards

Below are the effects of Action cards played on a Lord.

- **Move Lord 3** – Move one Lord (Baron or Knight) up to **3 Tiles**. The movement does not have to be in a straight line.
  - **Bonus:** If your Lord starts their movement on a **2-point Tile (Wolf)**, they gain **+1 Movement** (*representing a lush green land where they can regain their strength*).
  - **Constraints:**
    - ✓ A **Baron** or a **Knight** may not pass through or occupy a **Mountain Tile**.
    - ✓ A **Knight** has no other passing or occupying restrictions.
    - ✓ A **Baron** may **not occupy** a Tile occupied by an **enemy Baron** or an **enemy Keep**. However, a **Baron** may pass through such a Tile.
    - ✓ A **Baron** may pass through and occupy a Tile occupied by friendly or enemy Troops and Knights.
- **Move Lord 2** – Identical to "Move Lord 3," but with a maximum distance of **2 Tiles** (plus any potential terrain bonus).
- **Move Lord 1** – Identical to "Move Lord 3," but with a maximum distance of **1 Tile** (plus any potential terrain bonus).
- **Long Ride (Rare)** – Choose one Lord (Baron or Knight) currently on the board and move them directly to **any Tile of your choice**, respecting the occupation restrictions listed under "Move Lord 3."
- **Recruit Knight (Rare)** – If you have a Knight remaining in your Supply, place that Knight directly onto a Tile occupied by your **Baron** or one of your **Keeps**.
- **Exile Knight (Rare)** – If an **enemy Knight** is present on the same Tile as your **Baron**, that Knight is sent back to the **opponent's Supply**. If multiple enemy Knights are on your Baron's Tile, this effect **only** applies to **one** of them.

## 9.2. Combat – Control – Command

Before describing the **Troop Action cards** in §9.3, three key mechanics must be detailed:

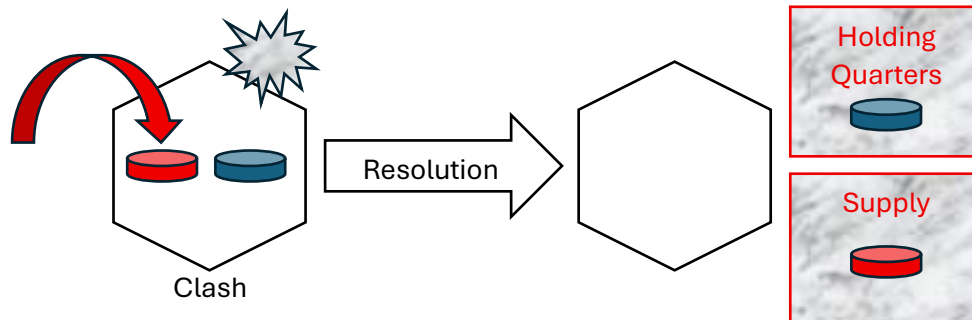

- **Clash Resolution:** Resolving "Troops vs. Troops" and "Troops vs. Keep" encounters.
- **Knight Control:** How Knights lock down a Tile.
- **Troop Command:** Issuing orders to Troops from a Tile.

### 9.2.1. Clash Resolution

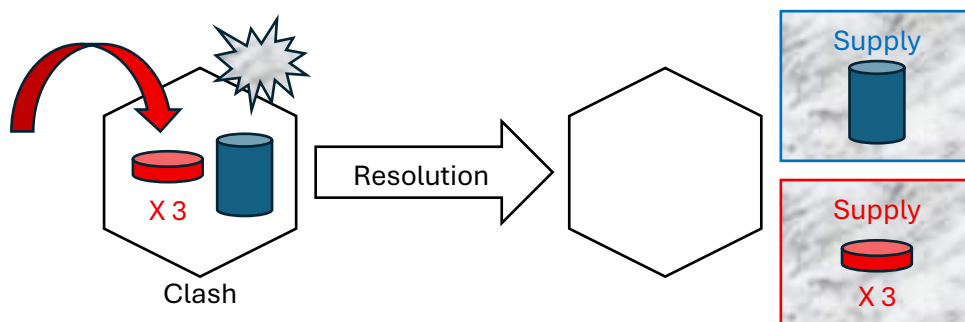

Clashes occur in the following situations. Resolving each clash is **mandatory and immediate**.

**The Vanguard Rule** – When performing a **Concentrate** or **Disperse** action, you may freely organize your engaged Troops into **multiple Assaults**. For each Assault, only the specific number of Troops necessary to resolve the combat (the **Vanguard**) is used. It is the number of attacking Troops present on the Tile **at the conclusion of an individual Assault** that determines the effect triggered on a Keep (Destruction or Capture)

- **Troop Clash** – On a Tile occupied by enemy Troops, the arrival of one or more of your Troops triggers a clash:

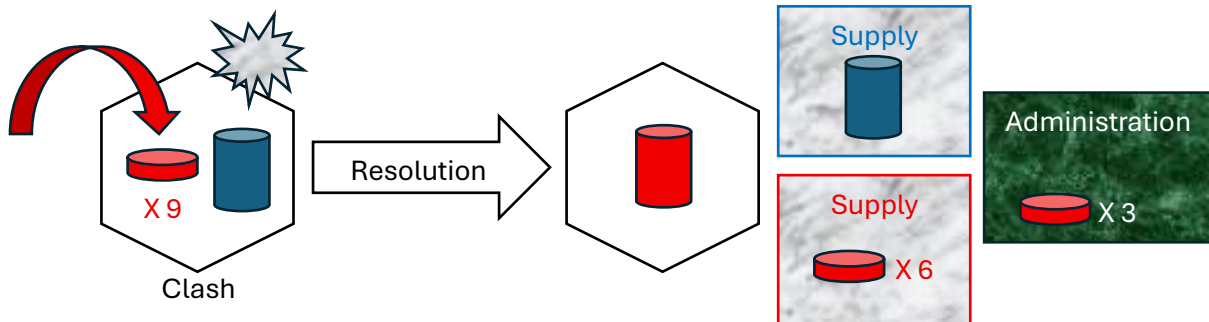

- The principle is: **1 Troop versus 1 Troop**.
  - Your **Troop** is the **attacker**. It is returned to your **Supply**.
  - The enemy **Troop** is the one being **attacked**. It is placed in your **Holding Quarters**.
  - Resolving **Troop Clashes** takes **priority over Keep Clashes** (see Keep Destruction or Capture).
- **Keep Destruction** – On a Tile occupied by an enemy Keep, the presence of your Troops may trigger a clash:

- The principle is: **3 Troops versus 1 Keep**.

- If, at the conclusion of an individual Assault, the presence of your **attacking Troops** is **equal to or greater than 3** (without reaching the Capture threshold), the **Destruction** clash is triggered.
- The **enemy Keep** is destroyed and returned to its owner's **Supply**.
- Your **3 attacking Troops** are returned to your **Supply**.
- **Keep Capture** – This is a powerful variation of "Keep Destruction»:

- The principle is: **9 Troops versus 1 Keep + 1 Keep**.
- If, at the conclusion of an individual Assault, the presence of your **attacking Troops** is **equal to or greater than 9**, the **Capture** clash is triggered.
- The **enemy Keep is destroyed** and returned to its owner's **Supply**.
- You immediately build a **Keep** of your own color on the Tile.
- **3 attacking Troops** are placed in **Administration**.
- **6 attacking Troops** are returned to your **Supply**.

**The Rearguard Rule** – If you move more Troops than necessary for a clash, the remaining units form the **Rearguard**. Their behavior depends on the action being performed:

1. **Concentration:** The Rearguard continues its movement toward the Command Tile.
2. **Dispersion:** The Rearguard must stop on the Tile where the clash occurred.

**Special Case: The Baron's Retreat** When a Capture succeeds against a Keep, if the defending player's **Baron** is **present** on that same Tile, he is **forced to flee**. The owner of the defeated Baron **must place it directly** (this does not count as a movement) on one of the nearest Tiles respecting normal occupation rules.

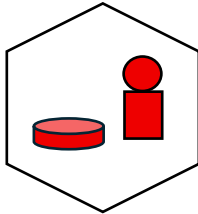

### 9.2.2. Controlling a Tile

A Tile is considered **controlled** by a **color** if that color has **strictly more Knights** on the Tile than any other individual enemy color.

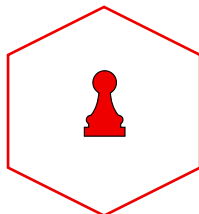

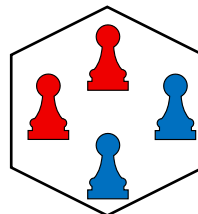

- **Ties or Absence:** If no color has a **majority**, or if there are no Knights present, the Tile is considered **uncontrolled**.
- **Note:** Barons, Troops, and Keeps never factor into the calculation for controlling a Tile; **only Knights** are taken into account.

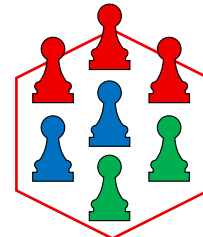

- **Note:** "Controlling a Tile" can block or limit the abilities of a "Command Tile," as explained in §9.2.3.
- **Examples of Tile Control:**
  - **1 Red Knight:** Controlled by the **Red side**.
  - **2 Red vs. 2 Blue:** Tie → **no control**.
  - **3 Red vs. 2 Blue vs. 2 Green:** Red majority → controlled by the **Red side**.

No Control

Controlled by **Red**

No Control

Controlled by **Red**

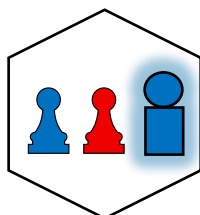

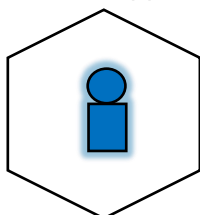

### 9.2.3. Command Tile

To play any **Troop Action card**, you must **designate** a **Command Tile**. There are three types of Command Tiles, each offering different capabilities:

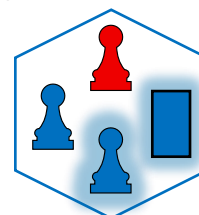

|  |                      |                                                                                                                        |
|--|----------------------|------------------------------------------------------------------------------------------------------------------------|
|  | <b>Baron</b>         | A Tile with your Baron can: <b>Recruit</b> , <b>Build</b> , <b>Concentrate</b> , and <b>Disperse</b> .                 |
|  | <b>Keep + Knight</b> | A Tile with one of your Keeps and one of your Knights can: <b>Recruit</b> , <b>Concentrate</b> , and <b>Disperse</b> . |
|  | <b>Keep</b>          | A Tile with only one of your Keeps can: <b>Concentrate</b> and <b>Disperse</b> .                                       |

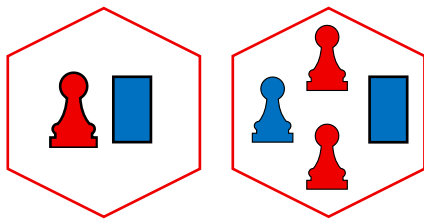

#### Knight Control Restrictions:

- You **cannot designate** a **Command Tile** if it is **controlled** (see §9.2.2) by **enemy Knights**. Your Command Tile must be either uncontrolled or controlled by your own Knights.
- **Loss of Recruitment Capacity** – The "**Keep + Knight**" Command Tile loses part of its capabilities when **enemy Knights** are present and **your Knights** are **not in the majority**, but merely tied (see §9.2.2). In this situation, your Knights engaged in the influence clash with their opponents suffer a loss of recruitment capacity: they **cannot raise Troops**.

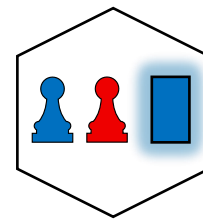

Blue Baron Command Tiles

Blue Keep + Knight  
Command Tile

Tiles **Controlled** by **Red**;  
**Command lost** by **Blue**

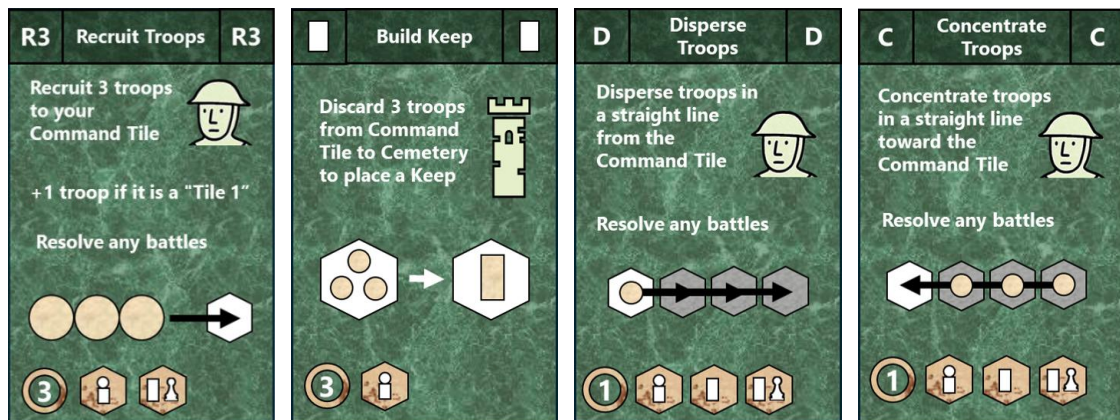

**Blue Keep Command** Tile

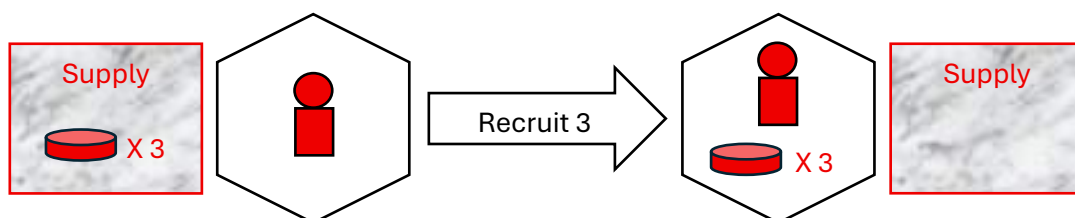

### 9.3. Troop Action Cards

Now that you are familiar with the mechanics of clashes, Tile control, and Command Tiles (see §9.2), you are ready to explore the effects of Troop Action cards.

The authorized Command Tiles for each card are indicated by **hexagonal icons** at the bottom of the Action card (see figure below).

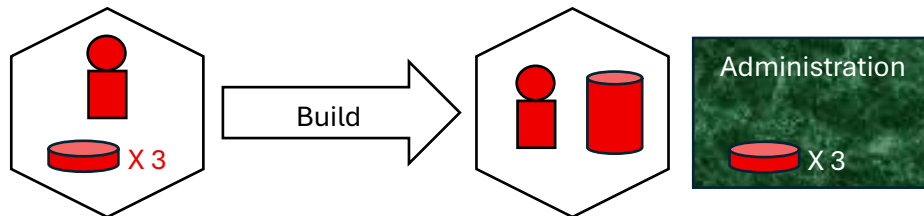

- **Recruit Troops 3** – On the designated Command Tile, recruit **3 Troops** taken from your Supply. If the Command Tile is a **1-point Tile (Gray)**, you gain a **bonus of 1 Troop** (*representing a poor land where it is easy to find recruits*). Furthermore:
  - If your Supply is not empty but does not contain enough Troops, recruit as many as possible. If your Supply is completely empty, you cannot play this card.
  - **Enemy Troops** occupying your Command Tile **do not block** recruitment. However, your newly recruited Troops must **clash with them immediately** (see §9.2.1).

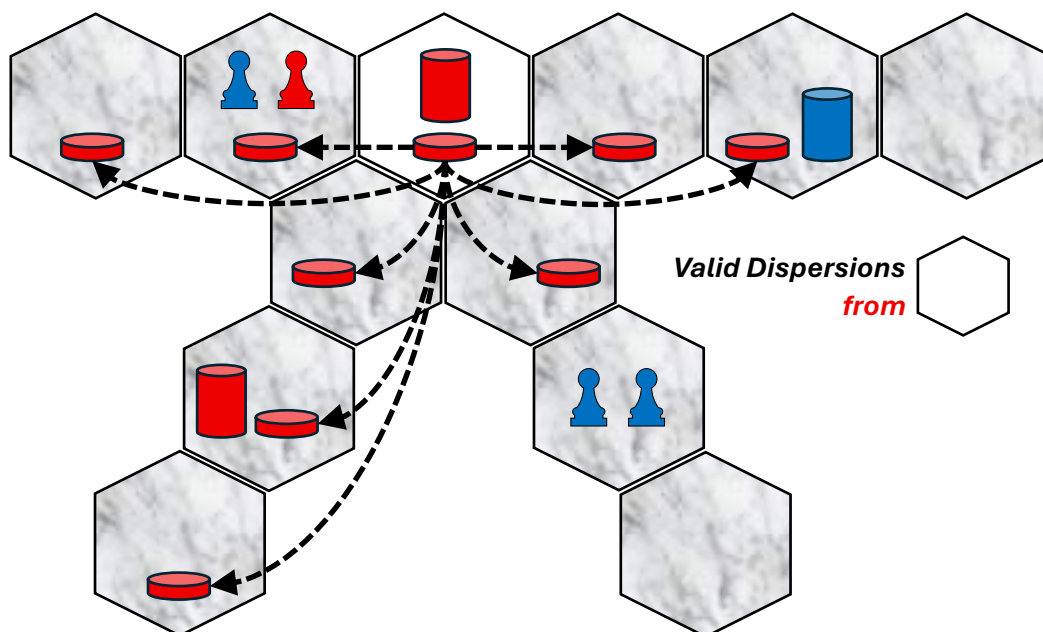

- **Recruit Troops 2** – Identical to "Recruit Troops 3," but you recruit only **2 Troops** (plus any potential terrain bonus).
- **Recruit Troops 1** – Identical to "Recruit Troops 3," but you recruit only **1 Troop** (plus any potential terrain bonus).

- **Build Keep** –You permanently assign **3 Troops** from the designated Command Tile to **Administration** (the common area defined during setup) and you place a **Keep** drawn from your Supply there. **Constraints:**

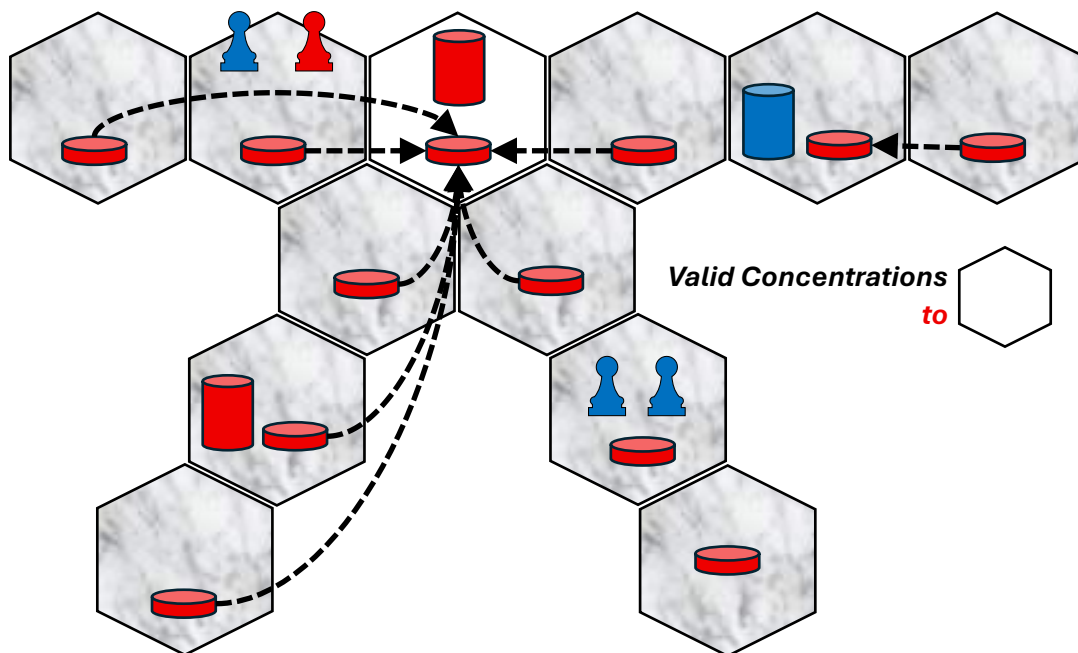

- **A Tile** may be occupied by **only one Keep**.
- **Two Keeps**, whether allied or enemy, **must not be adjacent** to each other.

- **Disperse Troops** – From the designated Command Tile, move some or all of your Troops:
  - Each Troop moves in a **straight line** in its own direction, as far as you choose.
  - A Troop may not cross or occupy a **Mountain Tile** or a **Tile controlled by enemy Knights** (see §9.2.2).
  - A Troop must stop to **resolve** any Troop or enemy Keep **clash** (see §9.2.1).
  - A Troop must stop when entering a Tile with an **enemy Keep**, even if no clash is triggered. If no clash occurs during this action, this Troop may be concentrated or dispersed during a future action.

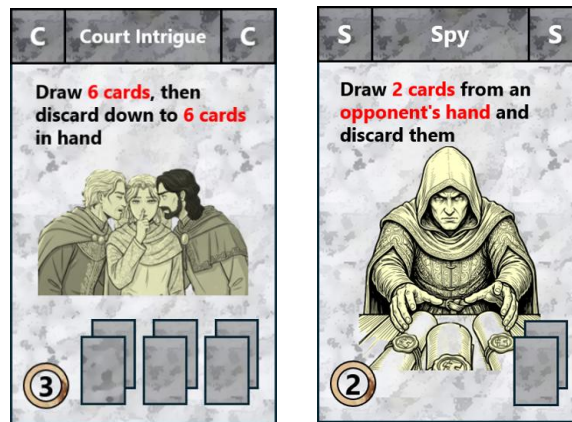

- **Concentrate Troops** – Toward the designated Command Tile, move some or all of your Troops that are aligned with said Command Tile:
  - Same rules as "Disperse Troops," but with the movement direction reversed. Specific rules are detailed below.
  - Each Troop moves in a straight line, **as close as possible to the Command Tile**. Any clashes triggered along the way are resolved immediately (see §9.2.1).
  - The concentration **order cannot pass through** a **Mountain Tile** or a **Tile controlled by enemy Knights** (see §9.2.2). Consequently, your Troops located on or beyond a Tile controlled by an opponent cannot be concentrated.

## 9.4. Hand Action Cards

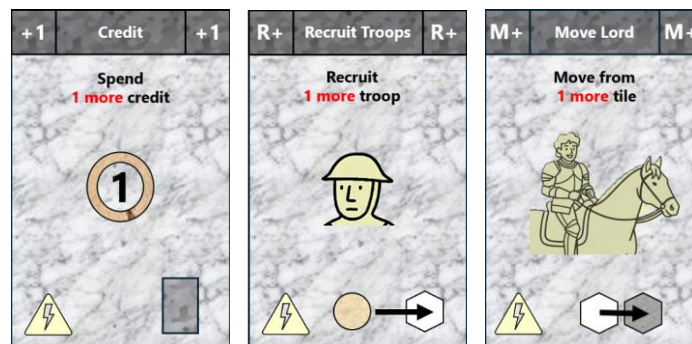

Here are the Action cards that affect your hand or an opponent's hand:

- **Court Intrigue (rare)** – After discarding "Court Intrigue", you first add **6 cards** to your hand from your deck. Then, you **discard** cards to keep only 6 in hand. **At the end of the "Court Intrigue" Action, you have 6 cards in hand, so you do not draw anything during the "Reinforce" phase.**
- **Spy (rare)** – Choose an **opponent**. Draw **2 cards at random** from their hand. **Reveal** these 2 cards **to all players** before placing them in that opponent's discard pile. The other cards remain in your opponent's hand.

## 10. The Effect Cards

Here are the Effect cards that act independently or in association with Action cards.

An Effect card is identifiable by the lightning bolt in the bottom left corner.

- **Additional Credit:**
  - This Effect card is played alone, during the Plan phase of Option A.
  - This Effect card increases by 1 credit the amount available to play your Action cards during this turn.

- **Additional Recruitment:**

- This Effect card is played in association with a "Recruit Troops" Action card (regardless of its value).
- This Effect card increases by 1 the number of Troops recruited by the Action card.

- **Additional Movement:**

- This Effect card is played in association with a "Move Lord" Action card (regardless of its value).
- This Effect card increases the maximum movement distance by 1 Tile.

11. Reference Sheet

Start of turn

Choose "Act" or "Replan"

Act

Choose cards for a maximum amount of credits

Play each card, then discard it

From a Command Tile

Recruit Troops

Build Keep

Disperse Troops

Concentrate Troops

Move Lord

Recruit Knight

Exile Knight

Spy

Court Intrigue

Replan

Discard 1 to 6 cards

Refill hand to 6 cards  
(except after "Court Intrigue")

Update the score track

End of turn

| Command Tile |                                                                                           |                                                                                                   |                                                                                          |   |
